

**B.Sc., CHEMISTRY**  
**PROGRAMME OUTCOMES**

On completion of the programme, the students are expected to

<b>PO1</b>	have firm knowledge on the principles, concepts, ideas and applications pertaining to chemistry
<b>PO2</b>	gain practical knowledge, synthetic and analytical skills in designing and carrying out chemical experiments
<b>PO3</b>	identify, articulate, analyse and solve problems with multidisciplinary approach
<b>PO4</b>	understand the importance of chemistry in social and economic issues for sustainable environment
<b>PO5</b>	get placement in industries, laboratories through their acquired experimental and analytical skills
